LUMECCA *Peak*

High-intensity IPL for spotless, radiant skin

Lumecca is an advanced Intense Pulsed Light (IPL) device created by InMode, designed for skin rejuvenation, targeting pigmented lesions (e.g. sunspots, freckles) and vascular lesions (e.g. telangiectasias, rosacea). The "PEAK" version signifies a higher-energy, optimized output design: higher peak power, shorter pulse widths, and more efficient energy delivery compared to standard IPL systems.

MORPHEUS8

Deep RF microneedling for tighter, smoother skin.

Morpheus8 is an advanced fractional radiofrequency (RF) microneedling treatment that remodels collagen, tightens skin, and improves texture at deeper levels than traditional microneedling. By delivering controlled RF energy beneath the surface, Morpheus8 smooths fine lines, reduces scars, lifts laxity, and enhances overall skin quality with minimal downtime.

Burst & Burst Deep

Burst delivers controlled radiofrequency energy at multiple depths simultaneously, targeting the superficial and mid-dermal layers. This mode smooths texture, tightens the skin, and improves fine lines with a more even, blended result.

Burst Deep penetrates deeper subdermal layers to remodel tissue, tighten laxity, and improve contour in thicker skin areas. It delivers stronger collagen stimulation for enhanced lifting, firming, and structural improvement.

TONE

Strengthen, sculpt, and define

TONE uses high-intensity electrical muscle stimulation to build and strengthen muscle fibers, creating improved definition and firmness in areas like the abdomen, glutes, arms, and thighs. This technology delivers consistent, precise muscle activation for noticeable improvements in strength and contour.

- Targets stubborn areas like abdomen, glutes, arms, and thighs
- Provides consistent, repeatable muscle activation not achievable through exercise alone
- Enhances muscle definition and overall firmness
- Improves endurance and functional strength

Dermal Fillers & Sculptra

Contouring & Restoration

Galderma fillers, such as Restylane, help restore volume, smooth wrinkles, and enhance facial features for natural, refreshed results. They're made with hyaluronic acid—the same substance your body uses to keep skin hydrated and firm.

Sculptra is an injectable treatment that helps your body naturally rebuild lost collagen to restore fullness and smooth hollow areas. Results appear gradually, creating a soft, natural lift that lasts up to two years.

Platelets Rich Plasma (PRP)

Platelet-Rich Plasma (PRP) is a regenerative treatment that uses the healing components of your own blood to stimulate collagen, improve tissue health, and support natural repair. By concentrating platelets and growth factors, PRP enhances skin quality, promotes hair regrowth, and boosts the results of treatments such as microneedling and Morpheus8. Because it relies on your body's own biology, PRP is safe, natural, and effective for patients seeking targeted rejuvenation.
